

Pain Medication Policy

It is the policy of Great Land Infusion Pharmacy to not owe any narcotic pain medication. If we do not have the full amount on premises we will inform the patient and give them the following options:

1. Wait until we get the full amount in stock
2. Pay for what we have in stock and dispense. **Note** the remainder is forfeit.
3. We will transfer the prescription elsewhere or give them the written prescription back.

Great Land Infusion Pharmacy will not carry stock on any **OXYCODONE** or **METHADONE** product. We will order it in as needed for our oncology and hospice patients only, with the understanding by the patient it will take 2 business days to get that medication in stock.

All patients receiving narcotic pain medications will show photo ID at the time of purchase. If the person picking up the medication is not the person the medication is for, their driver's license number will be noted on the sign out log.
